*The (NFPA) recommends the use of at least one CO alarm per household located near sleeping areas. For added protection, install additional CO alarms in each bedroom and on every floor of your home. Most CO alarms should be replaced 5 years after install or sooner. Smoke detectors shall not remain in service longer than 10 years from the date of manufacture.*

## WHY ARE SERVICE AND REPAIRS IMPORTANT?

**FACT:** A faucet that drips an average of one drop per second can waste up to 100 gallons of water in one week and up to 5,200 gallons a year.

## HIGH FUEL BILLS?

*Heat loss often occurs in the burner and combustion chamber of your heating equipment. Soot deposits block the transfer and the efficient generation of heat. Just 1/8" of soot can decrease boiler efficiency by as much as 8% and even more for 1/4".*

**Getting yearly service to keep your heat transfer surfaces clean or by updating out-dated equipment will put savings back in to your pocket.**

FULLY LICENSED & INSURED / LIC# IM12764, A16155

Our licensed and qualified technicians have been serving you and your neighbors for over 25 years. ASAP Services Inc. will continue to strive to provide you, the customer, with the same quality of service you are accustomed to and deserve. *We look forward to hearing from you soon.*

# Protect Your Investment

Try one of our Preventative Maintenance Programs

It is recommended by all manufactures to have regular preventative maintenance on equipment. The benefits to you as the customer include prolonged equipment life and savings on fuel cost. Preventative maintenance will also reduce the extent and frequency of failures and "untimely weekend breakdowns." The following work will be on the equipment listed if applicable.

**CUSTOM PRICING DESIGNED TO MEET YOUR SPECIFIC NEEDS.**

## Gas Equipment Preventative Maintenance Program \*

- ✓ Check for Gas Leaks
- ✓ Check Carbon Monoxide Levels
- ✓ Clean Burners and Pilot Assembly
